

Jonathan D Bright

Burnet, TX, (512) 766-2451, JBSpiritous@gmail.com: ORCID:[0009-0001-6780-149X](https://orcid.org/0009-0001-6780-149X) Link:linktr.ee/JBSpirit

PROFESSIONAL SUMMARY:

GIS student at Oregon State University focused on land-cover change, visual image interpretation, and spatial data documentation. Completing undergraduate research on rapid urbanization along the SH 29 corridor in Central Texas using Collect Earth Online and USDA LCMS. Comfortable turning public satellite products and sample-based interpretation into maps, tables, and written results for academic and applied audiences.

SKILLS:

• Google Earth/high-resolution imagery	• Data Entry and Editing
• Collect Earth Online	• Data Querying and Analysis
• (LCMS) Landscape Change Monitoring System	• Data Digitization
• ArcGIS StoryMaps/ArcGIS Online	• Data Cleaning & Standardization
• Sample-plot design and point interpretation	• Records Management
• Land-use interpretation/Land-Cover Analysis	• Archival Document Transcription & Handling
• Spatial data analysis	• Historical and archival records research
• Time-series change analysis	• Quality control and data accuracy
• Microsoft Excel/Google Sheets	• Technical & Academic Writing
• Cartographic design/map layout	• Proofreading & Editing
• Python (introductory; data querying and scripting)	• SQL (introductory; attribute and record queries)

EDUCATION:

Bachelor of Science in Geographic Information Systems with a minor in Data Science September 2025 - Present
Oregon State University, Corvallis, OR

Bachelor of Applied Science, Game Art June 2023 - January 2024
Full Sail University, Winter Park, FL

PROJECTS:

Undergraduate Research Jan. 2026 - Present | 5 hrs/week
Land-Cover Change along the SH 29 Corridor, Central Texas
Oregon State University URSA(Undergraduate Research, Scholarship, and the Arts) Remote
Manuscript submitted to the Journal of Earth Observation and Geospatial Applications (JEOGA), August 2026. Research showcase/symposium presentation.

- Interpreted 37 primary sample units (100 m × 100 m; 100 points each) in Collect Earth Online to classify current land cover along the Liberty Hill–Georgetown corridor.
- Compared sample results with USDA LCMS annual metrics for 2016–2026 to quantify change in developed land, agriculture/grassland, and tree canopy.
- Documented developed land increasing from about 5–8% to about 50–52% and tree canopy declining from about 48% to 22%, with peak clearing around 2022.
- Compared CEO labels with ESA WorldCover and USGS LCMAP at the same plots to place local interpretation against map-producer products.
- Wrote the manuscript as first author with faculty mentorship; prepared figures, tables, and methods for journal submission and research presentation.

West Virginia Coal Mining StoryMap 2026
Course term project Remote
<https://arcg.is/1CTyrn3>

- Built an ArcGIS StoryMap synthesizing published research and public spatial data on the environmental and economic legacy of coal mining in West Virginia.
- Designed locator and thematic maps, organized source material, and wrote the narrative for a public-facing web format.

VOLUNTEER EXPERIENCE:

Civilian Archivist

Jan. 2025 - Present | 5 hrs/week

U.S. National Archives and Records Administration

Remote

- Transcribe historical handwritten documents into digital text for long-term preservation.
- Ensure accuracy and consistency to support archival research and public access.

GIS Volunteer

Aug. 2026 - Present

GPN's GISCorps

Remote

- Joined GISCorps to contribute GIS support on short-term volunteer assignments for communities and organizations in need, including disaster response and humanitarian mapping.
- Applying GIS skills to short-term remote humanitarian mapping assignments and expanding proficiency in core GIS tools through active project participation.

Library Assistant Volunteer

May 2025 - Present | 4–8 hrs/week

Herman Brown Free Library

Burnet, TX

- Shelving and Circulation Support: Provided assistance with shelving returned materials and organizing library collections, ensuring books and other items were accurately sorted and easily accessible for public use.
- Genealogy Room Support: Collaborated on operations at the Elizabeth Van Gorkum Genealogical Center, helping visitors locate and use historical and genealogical resources for research.
- Book Repair and Maintenance: Participated in the repair and preservation of damaged library materials, including reinforcing book bindings, mending pages, and performing basic conservation procedures.

WORK EXPERIENCE:

Freelance Administrative & Client Support Assistant

Jan. 2021 - Dec. 2023 | 20–30 hrs/week (variable)

Remote — Upwork, Direct Clients

- Tracked 100–200 weekly e-commerce orders, and up to 2,000 during peak periods, with accurate status documentation.
- Built Excel and Google Sheets systems for inventory cleanup, SKU updates, and quarterly/annual summaries.
- Standardized digital records to reduce duplicates and order errors.
- Managed calendars, invoices, and client communication across email, Slack, and Zoom.

Freelance Proofreader

Jan. 2021 - Present | 5–10 hrs/week

Remote — Upwork, Direct Clients

- Edit academic, technical, and professional documents for grammar, clarity, and formatting.
- Return client-ready drafts on deadline.

Sales Associate / Customer Service Representative

Jun. 2018 - Jan. 2019 | 30–40 hrs/week

Walmart, Georgetown, TX

- Assisted customers in locating merchandise, completing purchases, and processing returns.

CERTIFICATES:

Microsoft 365 Essentials — LinkedIn (2024)

Microsoft Excel — LinkedIn (2024)

Customer Service Foundations — LinkedIn (2024)

QuickBooks Fundamentals — Intuit Academy (2024)

Certification in COI in Research Training — CITI Program (Feb-2026 through Feb-2029)
